

# FossFish

# OurWorld

---

- Technology is our future, software is key
- Commercial platforms need to work together
- The internet and web tech is moving very fast

How? Open Source Software

# OpenSource

---

- Build faster when the world can collaborate
- Real security when the world verifies your code
- Better interoperability with open standards
- Cross platform distribution
- Real community supported development tools
- Reduce learning curve for new programmers

# OurAims

---

- Create a great software dev environment
- Define an open platform for graphical IoT
- Build universal software delivery system
- Create ultimate cross platform dev box
- Support creation of many Open Source apps
- Champion software creation for all ages
